The image shows a digital interface for managing notifications. At the top right is a "Notifications" section with three small icons: a plus sign, a question mark, and a gear. Below this is a vertical list of notifications, each with a gray circular profile picture and a message. To the left of the notifications is a grid of 15 cards, each containing a large letter (A, H, Y, D, B, G, B, G, Y, C, Y, C, A, C, W, A) and a "see more..." button with a downward arrow. The cards are arranged in five rows and three columns. At the bottom of the screen are navigation tabs: HOME, MESSAGES, NOTIFICATIONS (which is highlighted in white), and PROFILE.

i'm kinda worried the site won't be bad enough

"So no matter what stage we're on, we don't have bugs." -Nikil

"weird flux but ok"  
-Callista

demo day JUNE 5!

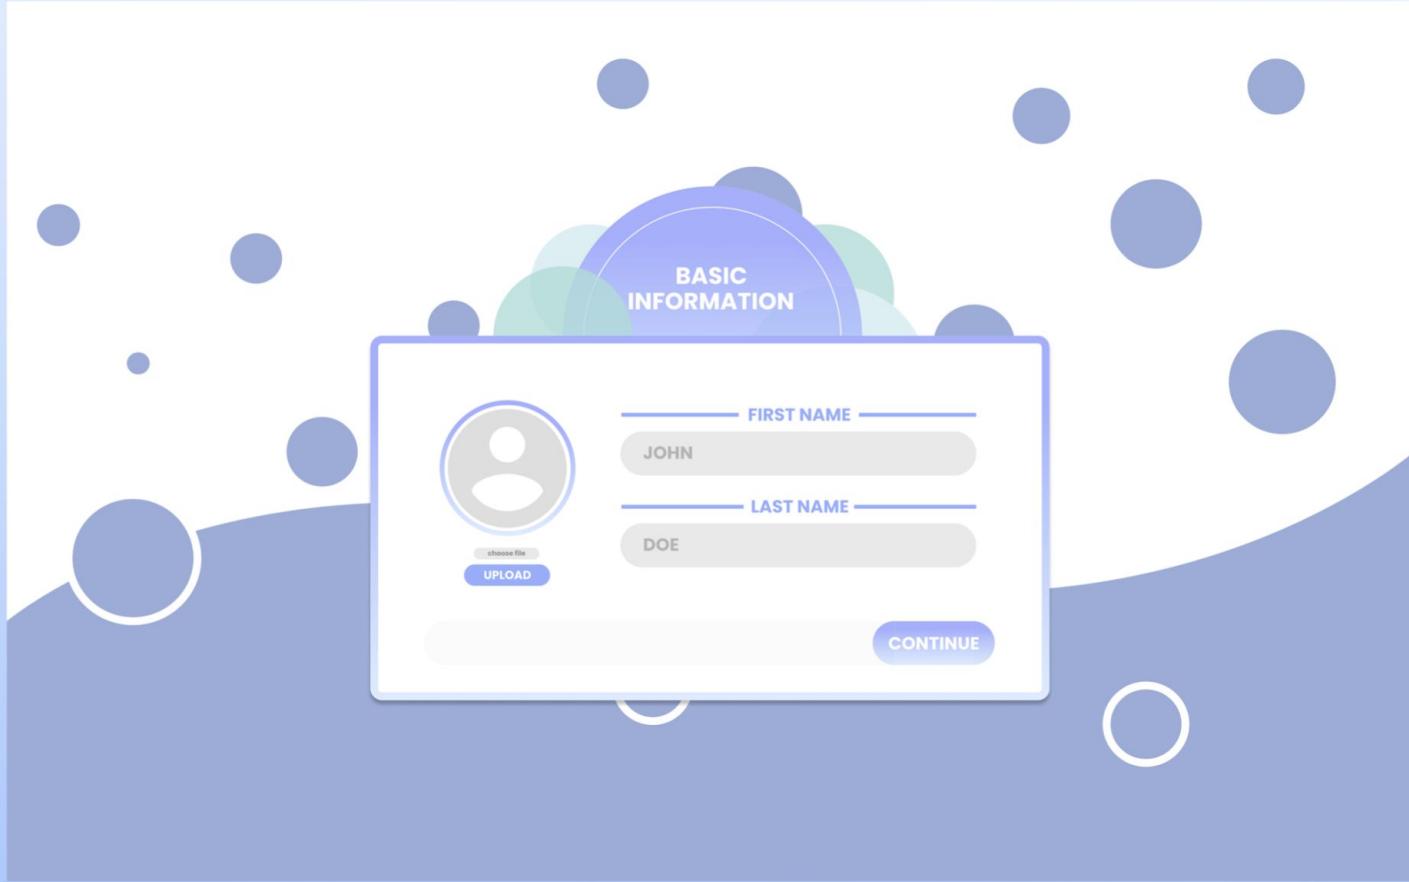

who knew being bad was this hard

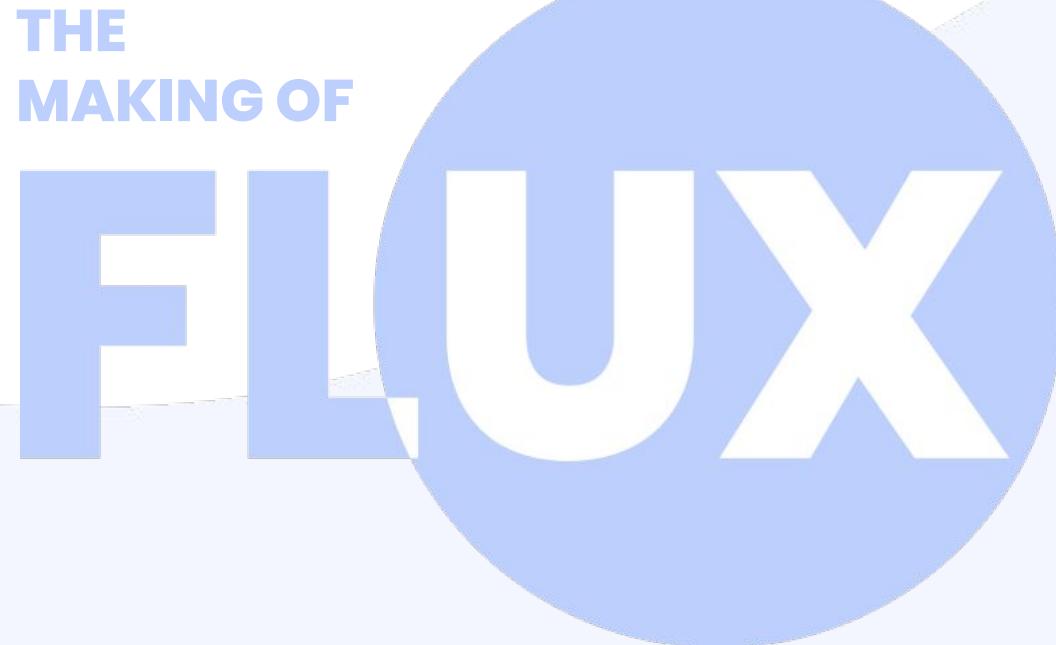

"They're features, not bugs."  
-Alex

## Finishing Touches

Updated 8 days ago

No description

...

## Make the site bad

Updated 7 hours ago

In this board, we're styling all of the components and adding the bad UX that this project is centered around! This is the bulk of the project and what it's all about!

...

## Make a functioning site

Updated 12 days ago

Setup all the dataflow between the app and firebase. Finish all functional features without any special styling. Projected end date: 5/3/19

...
